

Aftercare Advice for Semi Permanent Lash Extensions

- Avoid getting the lashes wet for 24 hours following treatment
- Avoid heat treatments (eg sauna, steam room) for 48 hours following treatment
- Avoid oil-based products, as these may break down the adhesive bond
- Avoid mascara and eyelash curlers
- Always pat the area dry; do not rub as this will loosen the adhesive bond
- Return for maintenance appointments every 2-3 weeks
- Do not try to remove the lash extensions yourself - a special adhesive remover needs to be applied to avoid breakage of the natural lash
- Use a disposable mascara wand daily to gently brush your lashes and keep them neat
